We at **Turku University of Applied Sciences (Turku UAS), Finland** have actively developed higher education to meet the global challenges of working life. Our training and development proposals are based on our experiences in implementing innovation pedagogy and on our active contribution in the international network applying it in various educational institutions.

Innovation pedagogy is a specific learning approach, which aims to enhance students' individual, interpersonal and networking innovation competences needed in the future working life. To achieve the competences the whole learning environment must be created in a new way and learning methods must be reviewed. One key element is enriching teaching and learning with educational research, development and innovation (RDI) methods. The development process includes several cases and examples of the implementation of innovation pedagogy. The intensive training days are based on a wide variety of activating, experiential and collaborative methods.

THE CORNERSTONES OF INNOVATION PEDAGOGY

Cornerstones of innovation pedagogy refer to all those methods and tools, which are necessary when implementing the innovation process in learning and aiming for the desired goals. These cornerstones all together contribute to the development of learners' innovation competences. They are:

- Working-life orientation
- Flexible curricula
- Multidisciplinary
- Renewing teacher and student roles
- Activating learning and teaching methods
- Integration between studies and applied RDI activities
- Versatile and development-oriented assessment
- Entrepreneurship
- Internationalization

Working life orientation, flexible curricula and multidisciplinary learning environments are essential requirements for innovation pedagogy to succeed. Renewing teacher's roles support, encourage and guide students in order to advance learning. Students need good study skills to take an active and responsible role in their own learning. The methods used in delivering the education must be activating and versatile. Giving students opportunities to work in real-life assignment and research & development projects is essential when aiming to improve their innovation. The assessment is development-oriented, i.e. students are able to assess their own and peers' competences and know how to develop them. Entrepreneurship and entrepreneurial attitude are encouraged, and internationalization is embedded into studies in versatile ways

THE BENEFITS OF INNOPEDA[®] FOR YOUR INSTITUTION

1. A new organization-wide strategic pedagogical approach for UFCSPA with the aim at changing the institution, its role in the local educational scene, its structures and the way it innovates for the future.
2. Bringing new, innovative methods for teaching and learning both on-site and online to ensure up-to-date skills of the entire staff
3. Ensuring that the needs of modern working life are met while educating future professionals and responsible citizens.
4. Adding flexibility into education through the use of Innovation Pedagogy Curriculum
5. Facilitating modern ways of assessment, evaluation and feedback with new roles of teacher and student
6. A reputable Finnish University of Applied Sciences, Turku UAS, provides the training.

PURPOSE OF THE INNOPEDA[®] MANAGER TRAINING

Innopeda[®] Manager Training is targeted especially for management, lecturers, education planners and RDI personnel. The objective of this training is to guide participants through a holistic development process to implement Innovation Pedagogy in your Health care education institution. The training is included in development process as well as the implementation and monitoring of the change. It may include staff exchange, site visits, process consulting and coaching. Content and follow up during the process:

- Experiencing the authentic Finnish educational culture in Finland
- Analysis of current situation
- Making the change – Conducting a personalized development plan at your institution according to Innovation Pedagogy
- Innovation Pedagogy intensive training in Finland and on client's premises (Covid -19 allowing) and online
- Activating methods for making the change with Innovation Pedagogy for increasing for increasing future health care professionals' competences and working towards the sustainable future

Extent and timing: The development process takes approximately ten (10) months. An online kick-off session with Zoom would be **arranged in June 2022**, followed by a study visit to Finland in September 2022. The training would continue until early 2023, including training onsite in Brazil. A separate schedule will be agreed with UFCSPA. **Please find the preliminary proposal as Annex 1.**

1 RESPONSIBILITIES OF TURKU UNIVERSITY OF APPLIED SCIENCES:
