Put the latest theories and tools into practice

Successful education leaders can anticipate the impact of new regulatory requirements, a change in regional working life or the implementation of new technology within their institution. Innopeda® for Managers offers the latest theories and tools for making the change.

The training aims to guide participants through a holistic development process and to implement innovation pedagogy in their educational institution. The development process includes intensive training on-site or online.

The training may include staff exchange, site visits, strategy consulting and coaching.

Each Innopeda® for Managers participant generates a development plan for their institution, revised by Turku UAS’ Innovation Pedagogy experts. As the result, the managers have tools to analyze new educational culture and implement an educational change.

Innopeda® EduTour to Finland

Experience the Finnish style education from
early to higher education

Contact us

(<https://link.webropolsurveys.com/Participation/Public919b-4212-8c63-bc0113bf91dd?displayId=Fin250>)

Get to know the Finnish success drivers

The EduTour aims to connect the participants with the Nordic educational atmosphere and gives an overview of the Finnish education from early to higher education.

Furthermore, the participants will learn about the innovation pedagogy framework and participate in workshops and discussions led by Turku UAS experts. The experience familiarizes participants with new, active ways of teaching and learning.

The EduTour covers the background of the Finnish welfare society and education, changes in future education and a pedagogical mindset.

We will also dive into innovation pedagogy as a strategy, discuss the innovation competencies, on-site and online learning environments and change in educational management aiming at a sustainable future.
